ACKNOWLEDGEMENTS

This edition of the Adult Hospital Level Standard Treatment Guidelines (STGs) and Essential Medicines List (EML) is evidence of the dedication, technical expertise, skills, and considerable time offered by the combined PHC/Adult Hospital Level Expert Review Committee (ERC) and the National Essential Medicines List Committee (NEMLC). The ERC has enthusiastically evolved with the EML review process, embracing Health Technology Assessment principles as South Africa transitions towards Universal Health Coverage. The dissemination and implementation of these guidelines is greatly encouraged and will ensure equitable access to affordable, good quality essential medicines. We appreciate the continuous participation in the peer review consultative process during the development of this edition of the STGs and EML. We would like to thank each Committee member for their valuable contributions, as well as the Chairpersons of the combined PHC/Adult Hospital Level ERC and NEMLC.
